## **ENVIROFINANCE GROUP PROVIDES \$11 MILLION LOAN FOR REMEDIATION PROJECT**

HONOLULU — EnviroFinance Group LLC has provided \$11 million in financing for the remediation, infrastructure and site development of a 174,240-square-foot land parcel in Honolulu. The borrower, Weston Solutions Inc., plans to take the 4-acre contaminated site, which was formerly a manufactured gas plant, through an extensive environmental remediation. After clean up, the property, which is located at 616 Iwilei Rd., will likely be developed into a retail center. Weston is investigating the use of an innovative in-situ chemical oxidation process to clean up the site, which is contaminated with high concentrations of benzene.
